

Precision 6" Chuck 3 jaw

Each chuck comes with 3 inside and 3 outside jaws. Jaws are serialized for greater accuracy. Inside jaws actually clamp a rod, up to ~ 2", stronger than the outside jaws.

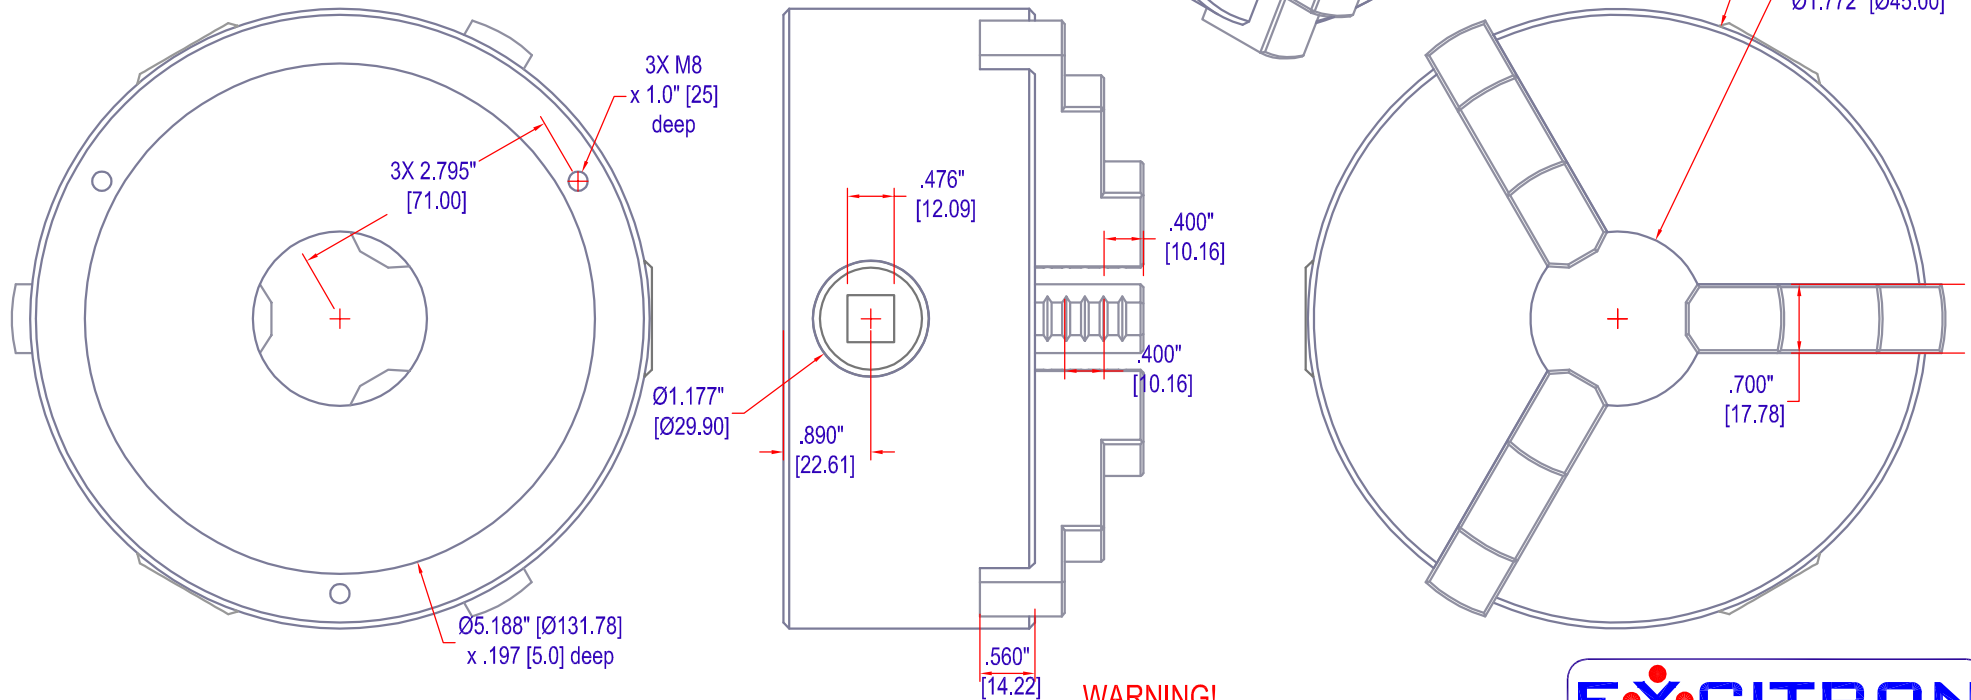

- All surfaces are ground high strength steel and hardened to HRC 58-62, except rear inner plate.
- Inside jaws clamping range is ~.08 to 6.3".
- Outside jaws jamming range is ~2 to 5.7".
- Runout is less than .002", possible to shim to zero.
- Weight is 20.3 lbs.

p/n: **Chuck6-3Jaw-SC** with self-centering dependent action

p/n: **Chuck6-3Jaw-I** with independent action

Items included:

- T-handle square wrench
- Key ring with 10 metric hex keys: 1.5 to 10mm.
- 3 M8 screws.

WARNING!
KEEP FINGERS AWAY FROM CHUCK
AND JAWS WHILE ROTATING!
